Company Name: NovaNest Technologies **Founded:** 2021 **Headquarters:** San Francisco, CA **Employees:** 85**Industry:** Smart Home & IoT **Website:** www.novanest.tech

Mission Statement

"To create seamless and intelligent living environments through cutting-edge smart home technologies."

Vision Statement

"A world where every home adapts, learns, and enhances daily living experiences through intuitive technology."

Company Overview

NovaNest Technologies is a rapidly growing smart home and IoT solutions provider focused on building a connected future. Leveraging advanced AI and machine learning, the company develops systems that enhance comfort, security, and sustainability in residential spaces. NovaNest partners with builders, developers, and homeowners to create fully integrated smart environments.

Product Line

1. NovaHub

- A central control unit for smart devices.

- Supports voice, app, and gesture control.

- Integrates with over 500 devices.

2. NovaSense

- Suite of smart sensors (motion, humidity, light, sound).

- AI learns patterns to adjust lighting, heating, etc.

- Sends real-time notifications via mobile app.

3. NovaVoice

- Smart assistant focused on privacy and local processing.

- Multilingual support.

- Customizable command routines.

4. NovaGrid

- Smart power management system.

- Tracks energy usage by device.

- Offers predictive savings insights.

5. NovaSafe

- Smart locks and surveillance system.

- Facial recognition and secure access logs.

- Integrates with emergency response services.

Technical Stack

Backend: Node.js, FastAPI, PostgreSQL
Frontend: React, TypeScript, Redux
Mobile: Flutter, Kotlin (Android), Swift (iOS)
Cloud: AWS (EC2, S3, Lambda), Firebase
AI/ML: TensorFlow, PyTorch, scikit-learn
